

Joshua Ian Cadiz

Junior Software Engineer

cadiz.joshuaiang@gmail.com

Relevant Experience

VIP Scale

Software Engineer Intern
Dec 2025 – Apr 2026

- Built and deployed websites for international clients using Kajabi, GoHighLevel, and React.js, improving client workflow efficiency and streamlining business operations.
- Designed and implemented AI-integrated workflows using n8n to automate tasks and enhance operational efficiency.

Personal Projects

Web Development
UI/UX Design
Database Design
Programming
AI Integrations

- Developed full-stack applications using HTML, CSS, JavaScript, React framework, implementing responsive UI, backend logic, and database management with a focus on UI/UX best practices.
- Integration of AI features into projects to assist users in improving productivity through task automation, smart suggestions, and workflow optimization.
- Applied object-oriented programming (OOP) using Java and C# to design and implement scalable software systems.

Selected Projects

Thesis Project

Smart Aquatic Steward (SAS):
An Automated Aquarium
Management and Water
Monitoring System (2025)

- Developed a real-time water parameter monitoring system for early problem detection and improved tank health.
- Implemented an automated water change and feeding system for consistent tank maintenance with minimal manual intervention.
- Developed a mobile app using React Native applying UX principles, such as clear information architecture to navigate the complexity of the app, enabling users to remotely manage tank monitoring, feeding schedules, and status alerts.
- Integrated SMS notifications to reduce reliance on internet connectivity for critical water parameter alerts.

Prismo AI

AI tool that extracts, enhances, paraphrases, and translates content from YouTube.

- Developed a web app integrating AI APIs (Gemini, Groq) into a unified tool for extracting, enhancing, paraphrasing, and translating YouTube content, improving repurposing productivity compared to using separate tools.
- Used a third-party API for YouTube transcript extraction instead of building and hosting a custom service, avoiding maintenance and deployment overhead.

Skills

Front-End Development

HTML5 & CSS3
Javascript
Typescript
React.js
Node.js, Express.js
Next.js
Tailwind CSS

Back-End Development

Node.js
Express.js
PHP
REST API
Supabase
Firebase
MySQL
API Integrations

Version Control

Git
Github

UI/UX Design

Figma
Canva
Wireframing and Prototyping
Attention to Detail
Creative Thinking

Programming

Java
Python
C#/C++
Object-Oriented Programming
Data Structures and Algorithm
Problem Solving

AI Tools and Automation

Gemini, ChatGPT, and Claude
Antigravity
Cursor
Prompt Engineering
N8N Automations

My interests

Full-Stack Development
Technology and Innovation
Game Development
Programming
Artificial Intelligence (AI)
Internet of Things (IoT)

Education

Western Institute of Technology

Bachelor of Science in Information
Technology (2026)

Awards and Honors

1ST Runner-up – Java Programming Competition (2025)

Programmer of the Year (2026)

Best Capstone Project (2026)

Best Capstone Project Presenter (2026)

Graduated with High Distinction (2026)
